

ANKIT RATHOD

Data Engineer | AWS | Snowflake | Databricks | Airflow | PySpark
asr95128@gmail.com | [+91-7878888792](tel:+91-7878888792) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Data Engineer specializing in scalable **ETL/ELT pipelines** and modern **data platforms** processing **2–5M+ records/day** on **AWS, Databricks, and Snowflake**. Strong foundation in **Medallion Architecture, Star Schema, SCD Type 2, distributed data processing (PySpark), workflow orchestration (Airflow), and dbt**. Delivered **50–60% query performance gains** and automated workflows reducing manual effort by ~50%. Collaborative partner with cross-functional teams delivering **data lake and data warehousing** solutions aligned with business objectives.

KEY ACHIEVEMENTS

- Improved Snowflake query performance by **60%** via optimized partitioning and incremental loading across 12+ production pipelines.
- Streamlined ETL workflows cutting manual processing effort by **~50%** using Airflow DAGs with delta validation, retry logic, and real-time alerting.
- Delivered a **real-time IoT telemetry analytics platform** (Kafka + Flink + Azure) with anomaly detection triggering SMS/call alerts within **5 seconds**.

EXPERIENCE

Data Engineer — Bizviz Technologies (BDB.ai), Bengaluru

Nov 2024 – Present

- Engineered **12+ scalable ETL/ELT data pipelines** on AWS S3 and Snowflake processing **2–5M records/day**; implemented partitioning and incremental loading strategies improving **query performance by 50–60%**.
- Architected **Medallion Architecture (Bronze/Silver/Gold)** on Databricks Delta Lake using **Star Schema and SCD Type 2**; partnered with BI teams to deliver ML-ready **data warehousing** datasets.
- Streamlined daily workflows via **Airflow DAGs** and **dbt data quality tests** (schema validation, null checks, row counts); deployed pipelines via **CI/CD (Git, Docker)** with OOP Python design patterns.

Data Service Engineer Intern — Windowmaker, Vadodara

Jan 2024 – Mar 2024

- Extracted and validated **100K+ records** via SQL; accelerated reconciliation cycles with Python **data quality** scripts, improving reporting accuracy.

PROJECTS

Fleetage Mobility — Real-Time IoT Fleet Analytics | Kafka · Apache Flink · Azure Functions · ADF · Synapse · Twilio

- Architected a **real-time streaming platform** using **Confluent Cloud Kafka + Apache Flink** for IoT telemetry ingestion and anomaly detection (overspeeding, fuel drops, temperature); triggered **SMS/call alerts via Azure Functions + Twilio within 5 seconds**.
- Designed **cold-path analytics** using Azure Data Lake, **ADF ETL pipelines**, and **Synapse Analytics** fact/dim models with BI dashboards delivering operational KPIs.

EOD Securities Pricing Pipeline | AWS S3 · Airflow · Snowflake · dbt · Power BI — [GitHub](#)

- Developed **automated API ingestion pipelines** for U.S. equity/ETF pricing into **AWS S3 data lake**; modeled **dbt incremental fact/dimension tables** with quality tests and Airflow orchestration — improving Snowflake query performance by 50%+.

Travel Booking Data Platform (Musafir.com) | Python · SQL · Medallion Architecture · XGBoost — [GitHub](#)

- Designed **Bronze→Silver→Gold Medallion pipelines** for booking and payment data; modeled **Star Schema + SCD Type 2** Gold tables for revenue analytics and trained an **XGBoost revenue prediction model** with customer segmentation clustering.

ShopVista E-Commerce Data Modernization | Azure · Databricks · ADLS Gen2 · PySpark · Docker · Power BI

- Implemented **ADLS Gen2 Medallion pipelines** using Databricks PySpark with schema validation and deduplication; published **Star Schema Gold tables** containerized via Docker, optimized for Power BI reporting.

DATA ENGINEERING EXPERTISE

Data Pipeline Development · Data Warehousing & Data Lake Architecture · Distributed Data Processing (PySpark) · Workflow Orchestration (Airflow) · Dimensional Modeling (Star Schema) · Real-Time Stream Processing (Kafka, Flink) · Data Quality & Validation · API Integration · Performance Optimization

TECHNICAL SKILLS

Programming: Python, SQL, PySpark

Data Engineering: ETL/ELT Pipelines, Data Warehousing, Data Lakes, Medallion Architecture, Star Schema, SCD Type 2, Incremental Loads, Batch & Stream Processing, Data Modeling, Data Quality Validation

Cloud Platforms: AWS (S3, Glue, Lambda, IAM) · Azure (ADLS Gen2, Data Lake, ADF, Synapse) · Databricks · Snowflake · Redshift

Streaming: Apache Kafka (Confluent Cloud) · Apache Flink · Event-Driven Architecture

Tools: Airflow · dbt · Docker · Git · Power BI · Azure Functions

Databases: PostgreSQL · MySQL · MongoDB

ML / AI: XGBoost · Scikit-learn · Pandas · NumPy · Feature Engineering · LangChain · RAG

EDUCATION

B.Tech in Information Technology — Dharmsinh Desai University

Aug 2020 – May 2024

CERTIFICATIONS

- Data Engineering Bootcamp** — Codebasics (AWS, Databricks, Snowflake, dbt, Airflow) | Pursuing: **AWS Certified Data Engineer – Associate**
